LinkedIn | GitHub | Medium | TryHackMe Profile

Profile

Offensive-security-focused 2nd-year BSc (Hons) Cyber Security undergraduate, ranked **Top 4% on TryHackMe** with daily hands-on practice against VulnHub and PortSwigger targets. Comfortable exploiting OWASP Top 10 vulnerabilities manually and building Python tooling to automate the process. Seeking a **Junior Penetration Tester internship** to apply enumeration, exploitation, and reporting skills in real assessment engagements.

Technical Skills

Web App Testing	OWASP Top 10, Burp Suite, SQLmap, ffuf, wfuzz, Gobuster, Feroxbuster
Network / Infra	Nmap, Metasploit, Hydra, Wireshark, Active Directory basics
Recon & API Testing	theHarvester, Shodan, recon-ng, Postman (Certified)
Scripting	Python (requests, automation, brute-force tooling), C, OOP
Systems	Parrot OS, Kali Linux, Windows Server/10/11, Proxmox VE
Blue-Team Basics	Windows/Linux log analysis, SIEM fundamentals (SOC Level 1)
Methodology	PTES, OWASP Testing Guide, CTF-driven problem solving

Projects & Practical Experience

OWASP Top 10 Automation Project

Python, Burp Suite, PortSwigger Labs

- Manually completed **77 PortSwigger Web Security Academy labs** covering the full OWASP Top 10.
- Built Python scripts (`requests`) automating auth bypass, brute-force, and request-tampering exploits.
- Published exploit write-ups and PoC code in the Offensive-Security GitHub repo and on Medium.

VulnHub CTF Exploitation & Write-ups

Parrot OS, Metasploit, Nmap

- Solved **10+ VulnHub machines** (DC series, GoldenEye, etc.) end-to-end: enumeration, exploitation, privilege escalation.
- Publish daily technical write-ups documenting attack chains, tools, and root-cause analysis.

Proxmox Pentesting & SOC Homelab

Proxmox, Linux, Windows, AD

- Built a virtualized lab (Proxmox VE) hosting vulnerable VMs and a simulated Active Directory environment.
- Practice offensive techniques and SOC-style log analysis in an isolated, safe network.

Certifications & Training

- Certified Ethical Hacker (CEH)** — EC-Council (*In Progress, exam scheduled end of Aug 2026*)
- Postman API Fundamentals Student Expert** — Postman (*Mar 2026*) — View Credential
- SOC Level 1 Pathway** — TryHackMe (*Completed*)
- Top 4% Global Ranking** — TryHackMe, maintained through continuous lab completion

Education

BSc (Hons) Cyber Security

Expected Feb 2028

Asia Pacific Institute of Information Technology (APIIT), Sri Lanka

Focus areas: Ethical Hacking, Network Security, Digital Forensics

Computing Foundation

Asia Pacific Institute of Information Technology (APIIT), Sri Lanka

Work Experience

Facility Operations & Fitness Instructor

Feb 2026 (1 mo.)

MFX Fitness Studio, Colombo

- Ran daily facility operations, client onboarding, and CRM/financial reporting in a fast-paced setting.

Facilities & Operations Coordinator

Jun 2024 (1 mo.)

The Pickle Island, Colombo

- Coordinated venue operations, maintenance scheduling, and financial reporting.
